**(#21810 SIDE PANNEL)**

**DIRECTIONS FOR USE :**

**FOR CONTROL OF NORWAY RATS (*Rattus norvegicus*) ROOF RATS (*Rattus rattus*) AND HOUSE MICE (*Mus musculus*).**

For use in and around buildings.

Place baits in areas visited by rats and mice such as tunnels, paths and where they usually eat. To be used indoors and outdoors within 15 metres of buildings. Rodenticide bait in tamper-resistant bait stations can be placed along the fence line of properties, outside of the 15-metre limit but within a 100 metres of buildings, if the station is securely fastened (e.g., nailed down) to the fence or the ground.

FOR RATS: Use 50-500g bait by station. FOR MICE: Place in small piles of 15 to 50g, every 2 to 3 meters. Replace any stale or mouldy bait every 15 days. Maintain bait supply until all signs of feeding stops.

**USE LIMITATIONS:** Bait **MUST** either be placed in tamper-resistant bait stations or in locations not accessible to children, pets or livestock or non-target wildlife. **DO NOT** place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food.

- Bait stations (**tier 3**) used for the placement of rodenticide bait indoors, in locations not accessible to pets or livestock must have the following characteristics:
  - be constructed of high-strength material (e.g., metal or injection moulded plastic) and resistant to destruction by children;
  - have an entrance designed so that children cannot reach the bait;
  - have an internal structure that prevents bait from being shaken loose;
  - have an access panel that fastens securely and locks (e.g., metal screw or padlock);
  - bear the product name, active ingredient, guarantee, registration number, “WARNING POISON”, and the skull and crossbones symbol.
- Bait stations (**tier 2**) used for the placement of rodenticide bait indoors, in locations accessible to pets or livestock must have the following characteristics, in addition to those outlined above for tier 3 bait stations:
  - resistant to destruction by non-target animals; and
  - have an entrance designed so that non-target animals cannot reach the bait.

Bait applied outdoors and above-ground **MUST** be placed in bait stations.

- Bait stations (**tier 1**) used outdoors, above-ground, in locations accessible to children, pets and non-target wildlife must have the following characteristic, in addition to those outlined above for tier 2 and 3 bait stations:
  - be resistant to destruction or weakening by elements of typical non-catastrophic weather (such as, snow, rain, extremes of temperature and humidity, direct sunshine, etc.).

**PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN, PETS AND LIVESTOCK. DO NOT HANDLE WITH BARE HANDS.** May be harmful or fatal if swallowed or absorbed through the skin. Do not open pre-measured place packs. Chemical-resistant gloves must be worn when disposing of dead rodents,

unconsumed bait and empty containers. Avoid contact with eyes, skin or clothing. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Wash skin thoroughly with soap and water after handling. Wash contaminated clothing, separately from other laundry, with soap and hot water before reuse. **KEEP AWAY FROM FEED AND FOODSTUFFS.** Keep out of lakes, streams or ponds.

**FIRST AID:** If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. If swallowed, call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. If pet or livestock poisoning is suspected, immediately contact a veterinarian. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** If swallowed or absorbed, this material may reduce the clotting ability of the blood and cause internal bleeding. Vitamin K<sup>1</sup> administered in the form of intramuscular or subcutaneous injections, or by oral ingestion are suggested remedial treatments for anticoagulant poisoning. The severity of the case measured by establishing prolonged prothrombin times (P.T.) will determine appropriate therapy. Monitoring P.T. will indicate the necessity of repeated treatments.

**STORAGE AND DISPOSAL:**

**STORAGE:** Store in a cool, dry place away from other chemicals and food or feed. Store product not in use, in original container, in a secure location inaccessible to children and non-target animals. Keep away from fire or open flame, or other source of heat.

**DISPOSAL:** Do not reuse empty container. Dispose of unused or spoiled bait in accordance with local requirements. Follow provincial instructions for any required cleaning of the container prior to its disposal. Make the empty container unsuitable for further use. Dispose of the container in accordance with provincial requirements. For more information on the disposal of unused or unwanted product and the cleanup of spills, contact the provincial Regulatory Agency or the Manufacturer.

**RODENT DISPOSAL:** Dispose of dead rodents in household garbage or by burying.

**NOTICE TO USER:** This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
