DIRECTIONS FOR USE:

To be used only in the manufacture of a rodenticide which is registered under the *Pest Control Products Act*.

DO NOT discharge effluent containing this product into sewer systems, lakes, streams, ponds, estuaries, oceans or other waters.

PRECAUTIONS:

PREVENT ACCESS BY UNAUTHORIZED PERSONNEL. Fatal if swallowed or absorbed through the skin. DO NOT get on skin. May be fatal if inhaled. DO NOT breath dusts. Avoid contact with clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

FIRST AID:

If swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

Cholecalciferol causes hypercalcaemia. Treat symptomatically. Treatment would include fluid intake or intravenous hydration with normal saline as most important measures. Low calcium diet is recommended. Monitoring serum calcium levels may aid treatment. Alternative emergency treatment options include bisphosphonate therapy or anti-resorptive agents (e.g. denosumab). Cortisone or dialysis have been used successfully in some cases.

STORAGE:

Keep in original container during storage. Store product in cool, dry, well ventilated place away from seed, feed, fertilizer, or other pesticides.

DISPOSAL:

Canadian manufacturers should dispose of unwanted active ingredients and containers in accordance with municipal and provincial or territorial regulations. For additional details and cleanup of spills, contact the registrant and the provincial or territorial regulatory agency.

NOTICE TO USER:

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label.
